REMARKS/ARGUMENTS

Claims 1-29 are pending. Claims 4-25 remain withdrawn. Claims 1 and 3 have been amended. New claims 26-29 have been added. Claims 1-3 and 26 and 29 belong to the embodiments associated with figures 3, 4, and 6 (i.e., Species 2) that were elected in the amendment filed on May 27, 2004.

Figure 1 has been amended to include -- Prior Art --. The drawings were objected to as failing to comply with 37 C.F.R. § 1.84(p)(5) for not including a reference number mentioned in the description. Paragraph 34 of the specification has been amended to remove the reference number.

Claims 1-3 were rejected under 35 U.S.C. § 102(e) as being anticipated by Simonnet. Applicant respectfully traverses the rejection. Claim 1 recites, "a peripheral junction region of second conductivity formed at least partly within the isolation diffusion region and formed proximate the first surface of the isolation diffusion region, the peripheral junction region being configured to float electrically; and a passivation layer provided over the upper surface of the substrate, the first surface of the isolation diffusion region, and the peripheral junction region; wherein the peripheral junction region is different than the first and second conductive regions, and wherein the first and second electrode terminals define a vertical electrical current path therebetween." Simonnet does not disclose at least the above recited features. Claim 1 is allowable at least this reason. Claims 2-3 depend from claim 1 and are allowable at least for this reason.
